

CFTC Compliance Information

Allergens

Regulation (EU) No 1169/2011 of 25 October 2011 Annex II

Application area

This confirmation is relevant for all our lubricants used in the food industry. A contact to food is not out of reach for these lubricants. Lubricants with at least an H1 registration are proofed by the NSF to be safely used in the food production process where an incidental food contact might occur.

For these lubricants we proofed the risk of carry-over of substances with an allergenic potential as mentioned below.

Our H1 registered lubricants are designated for application in food industries but they are technical products which are not designated for direct human consumption.

For lubricants without at least an H1 registration a contact to food should be avoided unconditionally. A carry over of lubricant to food is not possible. Therefore the ingredients of these lubricants have not been checked for contamination by substances with allergenic potential acc. to the a.m. regulation.

Regulation (EU) No 1169/2011

To protect consumers against allergies caused by food the legislative body has decreed this guideline which requires declaration of special allergenic food additives on the label of foodstuffs.

According to Annex II these allergens are:

- *Cereals containing gluten, namely: wheat, rye, barley, oats, spelt, kamut or their hybridised strains, and products thereof*
- *Crustaceans and products thereof*
- *Eggs and products thereof*
- *Fish and products thereof*

- *Peanuts and products thereof*
- *Soybeans and products thereof*
- *Milk and products thereof (including lactose)*
- *Nuts, namely: almonds (Amygdalus communis L.), hazelnuts (Corylus avellana), walnuts (Juglans regia), cashews (Anacardium occidentale), pecan nuts (Carya illinoensis (Wangenh.) K. Koch), Brazil nuts (Bertholletia excelsa), pistachio nuts (Pistacia vera), macadamia or Queensland nuts (Macadamia ternifolia), and products thereof*
- *Celery and products thereof*
- *Mustard and products thereof*
- *Sesame seeds and products thereof*
- *Sulphur dioxide and sulphites at concentrations of more than 10 mg/kg or 10 mg/litre in terms of the total SO₂ which are to be calculated for products as proposed ready for consumption or as reconstituted according to the instructions of the manufacturers*
- *Lupin and products thereof*
- *Molluscs and products thereof*

We confirm that the a.m. allergens are not component part of the composition of our H1 registered lubricants.

Additional service for our customers

For optimum lubricant management, Klüber Lubrication has developed a programme called Klüber Total Productive Management (TPM) Services. TPM Services offers professional solutions for high hygiene requirements in storage, use and labelling at food-processing and pharmaceutical manufacturing plants.

We are pleased to offer TPM Services to our customers. For more information please get in touch with your local Klüber support.

The data in this CFTC Compliance Information is based on our general experience and knowledge at the time of printing and is intended to give information of possible applications to a reader with technical experience. It constitutes neither an assurance of product properties nor does it release the user from the obligation of performing preliminary tests with the selected product. We recommend contacting our Technical Consulting Staff to discuss your specific application. If required and possible we will be pleased to provide a sample for testing. Klüber products are continually improved. Therefore, it cannot be assured that the technical data in this Material Compliance Information will remain unchanged unlimitedly. Current product data are available in the respective product information leaflets stored on our website.
