

Technical Data Sheet

MOLYPLEX RH20 SPRAY

EP lubricant and assembly paste in spray

Description

MOLYPLEX RH20 SPRAY is a special spray product containing MoS₂ and graphite. This extremely performed EP lubricant in spray is formulated for lubrication of open gears, telescopic surfaces, sliding guides, joints and similar applications, working under particularly heavy conditions, extreme pressure and elevated temperature. This product spray can also be used as assembly paste (assembly and disassembly will be easier and faster), running-in and multi-purpose paste. MOLYPLEX RH20 SPRAY protects against wear, running-in defects, corrosion and rust. It creates strong dry lubricant and protective film.

Properties

- excellent water resistance
- outstanding featuring against corrosion
- huge range of working temperature
- extremely resistant to high pressures
- perfect adhesiveness

Technical Data

Max. operating temperature (dry film)		°C	-30/+650
Four-ball test (welding load)	ASTM D2596	N	ca. 7000
